PROJECT

AUTOMATED PNEUMONIA DETECTION USING CHEST X-RAY IMAGES

- Developed a deep learning-based Pneumonia Detection System using chest X-ray images.
 - Built and trained a Convolutional Neural Network (CNN) model using Python and TensorFlow.
 - Classified X-ray images as Normal or Pneumonia with improved prediction accuracy.
 - Applied machine learning and medical image analysis concepts for healthcare applications.
 - Performed image preprocessing, data augmentation, and model evaluation for better performance.
-

EDUCATION

B.E in Computer Science And Design

November 2022 – April 2026

- B.E. Computer Science and Design Engineering in Sethu Institute of Technology, Kariyapatti – Autonomous with 78% (2022-2026).
 - Higher Secondary Certificate in S.B.K Boys Hr. Sec School, Aruppukkottai with 75.3% (May 2022).
 - Secondary School Leaving Certificate in Govt High School, Thonugal with 75.2% (March 2020).
-

COURSE CERTIFICATE

Java Certification

- Completed comprehensive training covering Core Java fundamentals, Object-Oriented Programming(OOP), exception handling, collections framework, multithreading, JDBC, and file handling.
- Advanced Java topics include Servlets, JSP, and basic web application development concepts.
